

CraftStudies @ the Hanover League of NH Craftsmen is very fortunate to have three extraordinary studios where people of all ages, experience levels and socio-economic status can come and take classes in pottery, metalsmithing (Jewelry & small metal sculpture), basket making, felting, beading, and so much more.

However, providing instructors with a livable wage and covering operational costs can make classes prohibitive to people, so the generosity of the Co-op's shoppers helps us cover some costs and keep tuition more affordable.

We are delighted to be a part of this program and the monies received are used to defray the cost of our arts & crafts classes, particularly our summer camps offered to kids aged 5 through teen.

Here are quotes from evaluation forms:

*How was your experience with the instructor?*

Great! I love Ginger, she is a joy to have worked and is easy to understand ...

Margaret was fun and help[ed] me make the best clothes I could

*What did you like most about the course? The least?*

What I liked least was how the course was over so fast!

I loved how I could come up with what I wanted, and then make it come to life

I got to be creative

I liked that we could basically do whatever we wanted for our final project. My least favorite was the timeframe ...

*Something I'd like to say about this course ...*

EPIC!

Thank you!
